

The Federal Communications Commission

Dear The Federal Communications Commission,

Good Day:

I most certainly DO NOT want to see charges for my telephone service increased! I STRONGLY urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I have no doubt that this fee will eventually make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

John Brunk
